

Renewable

2nd grade: Science

Write R for renewable and N for nonrenewable next to each resource.

Natural Resources – Renewable or Nonrenewable?

Some natural resources can be replaced, and some cannot.

Renewable means we can use them again and again (like trees, water, or sunlight).

Nonrenewable means they can run out (like coal, oil, or natural gas).

Sunlight _____

Wind _____

Coal _____

Natural gas _____

Trees _____

Water _____

Oil _____

Gold _____

Write renewable or nonrenewable for the resource each item comes from.
